

Sprint 2 Report

Groovo

Team Groovo

11/04/2025

Actions to Stop Doing

List the activities or actions the team determined they should stop doing. Include a brief explanation for each.

Beginning work without clarity on who's doing what: The team should stop starting tasks without clearly defining roles and responsibilities. This lack of clarity often leads to confusion, duplicated efforts, and inefficiency.

Actions to Start Doing

List the activities or actions the team would like to start doing to improve their development process. Include a brief explanation for each.

Being proactive and contributing in a significant way (for Srikar mainly): The team should encourage Srikar to take more initiative and engage more deeply in the work. This will help balance the workload and improve overall team performance.

Updating the team on what a member has done at least 3 times a week: Regular updates will help everyone stay aligned on progress and identify blockers early. It will also foster better communication and accountability within the team.

Adding more comments on code for clarity: Writing clear and meaningful comments in the code will make it easier for others to understand and maintain. This practice will also reduce confusion during reviews and future development.

Actions to Keep Doing

List the activities or actions that are working well and should continue.

Sharing Documentation: The team's practice of sharing documentation ensures transparency and knowledge sharing. Continuing this habit will maintain consistency and help onboard members more efficiently.

Work Completed / Not Completed

****User Stories Completed:****

- User story 1-5(some tasks not completed)

****User Stories Not Completed:****

- User Story 6: As a user, I want to like or comment on reviews. (Added to sprint 3 backlog)
- User story 5 task 6: added to backlog (Update average rating dynamically)
- User story 2 task 3: still being implemented by Adam(fetch and display album reviews
